

Group 10

-Meetings are to follow a predetermined schedule and it's every member's own responsibility to attend these. If a member won't be able to attend, be late or need to attend the meeting online they are to communicate this to the group.

-All communication between the physical meetings will be either on Messenger (Facebook) or Discord. Messages that don't need to be saved can be sent on Messenger, such as "I will be late" or "I will not be able to attend the meeting". All other information, like file sharing and project discussions, should be sent in Discord rather than Messenger.

-A member is expected to be available from 9am to 4pm.

-Regarding decision making in the group, our goal is to make decisions by consensus. If this isn't possible for some reason, the next step for the group is to make the decision by majority.

-In the team there are no stupid questions and ideas. We should help each other and listen to what everyone has to say. To be able to help each other, if you encounter a problem you should ask the others in the team for help right away.

If any member breaks this social contract:

This member should be confronted in a constructive way.
