

Team Reflection - Sprint 5

Scrum master: Wilma

Product owner: Pauline

Generally this week has worked well and there is a friendly environment in the team. We work well together and things run smoothly.

Some problems this week is that we had a lot of sickness in the group. On our last meeting on Friday, only four people were there in person which was only half the group. So this made the retrospective a little more difficult but we still discussed some valuable topics.

Another issue during this week's sprint was a commit issue, the commit ignored out .gitignore and pushed 5000+ files into one commit. This made it an issue during our "merge to main" phase. This was easily solved but was an annoyance.

We improved our previous issue with being out last minute with bookings, and had all rooms booked before the week started. This resulted in less time spent organizing the meeting, and less confusion among the group.

This week we continued with pair programming which worked well. By working closely with other people you can solve problems easier because you work together towards the same goal. It is also fun to work with someone and you have fun while doing it.

We had two big cards left from last week so this sprint was a bit bigger than we anticipated at first. Therefore the Product Owner prioritized carefully so the client got the most value out of the product in case we couldn't finish all tasks. It was our biggest sprint yet but we finished all the tasks which we're proud of.

In the upcoming, and last sprint, we want to do some finishing touches and maybe add functionality if we think we have the time. One thing we would like to add, for example, is an escape hatch on the logo.

Backlog

- As a creative individualist I want a personal tracker so that I can personalize my experience.
- As a creative individualist I want to be able to add my own cards so that I can track the progress of my own personal goals.
- As a forgetful person I want my counters to automatically reset each week so that I can track weekly habits.

Sprint Backlog

- 018 As a motivated teenager I want to be able to save my progress for each habit so that I can start developing my habits.
Epics: 13, Contributors: HH, KH
- 025 As a user with bad eyesight I want a lot of contrast on the site so that I can see everything without problem.
Epics: 2, Contributors: U
- 021 As a statistician who likes to see the big picture I want to be able to see the calendar in a monthly/yearly view so that I can see how my habits change over a bigger amount of time.
Epics: 1, 13, Contributors: EA, U
- 022 As a minimalist I want to be able to track my habits by choosing what cards that are visible, so that I can track the habits that are most important to me.
Epics: 13, Contributors: AD, IW, KH

In Progress

Testing

Done

- 020 As a elderly person who uses the marker when I read I want the card only to turn around when I click on them so that I can read without the card flipping.
Epics: 5, Contributors: IW
- 019 As a front-end developer I want to have a common design on all pages so that the website looks cohesive.
Epics: 8, Contributors: AD
- 009 As a user I want a database so that my information can be stored in the future.
Epics: 8, Contributors: IW
- 015 As a user I want a standard view with habits so that I can easily get started with tracking my habits.
Epics: 8, Contributors: U
- 008 As a user I want to have several buttons to push when I did something good for the climate, so I can start growing different habits.
Epics: 8, Contributors: IW

TRACK

The screenshot shows a software interface with a dark green header bar. On the left, there is a vertical sidebar with a light beige background. At the top of the sidebar, it says "Weekly statistics" followed by a small color-coded legend for days of the week: Sun (light blue), Mon (medium blue), Tue (dark blue), Wed (purple), Thu (dark purple), Fri (black), and Sat (lightest blue). Below this, it says "Yearly statistics" followed by a larger color-coded legend for months: Jan (light blue), Feb (medium blue), Mar (dark blue), Apr (purple), and May (black). The main area of the sidebar contains several small, illegible icons and text snippets. At the bottom of the sidebar, there is a dark green footer bar with the word "Footer" in white.

TRACK

The screenshot shows a software interface with a dark green header bar. In the center of the screen, there are eight rounded rectangular buttons, each containing a team member's name: Isak, Lovisa, Emma, Atosa, Pauline, Kristin, Hanna, and Wilma. These buttons are arranged in two rows of four. Below this, there is a large, mostly empty light beige area. At the bottom of the screen, there is a dark green footer bar with the word "Footer" in white.

The screenshot shows the 'All Habits' section of the TRACK app. It displays six cards, each representing a habit with an icon, a description, and a 'Done' button.

- Turning off the water when brushing your teeth. (0 times)
- Saving water during the dish washing by filling up the sink first, and not letting the water run. (20 times)
- Sorting the waste and recycle what you can. (6 times)
- Eating the food on your plate, not letting it go to waste. (6 times)
- Carpooling, taking the bike, or public transportation. (0 times)
- Buying an eco friendly food product (or similar), instead of a product that is worse to the environment. (0 times)

Below the cards are four additional icons: a lightbulb, an apple, a bottle, and a pair of socks.
